- II. Rejection of claims 1,2,6-8 under 35 USC 102(b) as being anticipated by Zimmerman will not be maintained for reason on record and reason as follows.

- III. New Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4,6-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

R4 = H and one or two of R5, R6, and R8 each or a lower alkoxy is new matter. See 6th line from the last line in claim 1. The specification supports one or two of R4, R5, R6, and R8 each represent halogen or lower alkoxy.

Art Unit: 1616

R6 = H is new matter. See 5th line from the last line in claim 1. The specification defines R6 as instant radical (2) and does not define R6 as being hydrogen.
